

Solution:  
Networking,  
Edge to cloud

Industry:  
Education

Country:  
UAE

**“Access to HPE Aruba Networking Central as a cloud-native management platform, means we don’t need IT managers in each school. We can manage everything from one pane of glass.”**

**– Noorish Moosa**

## Creating an inspiring learning environment for all

PACE Education currently operates nine schools in the UAE, plus six in India. It teaches 25,000 students, representing over 55 nationalities. In a crowded market, PACE pitches itself at the midmarket. Though it delivers high standards of education, it has nominal fee structures that benefit medium- and lower-income families. The group is dedicated to promoting an effective learning environment that encourages excellence and diversity in thoughts and endeavors.

### Objectives

- Deliver a first-class education at a midmarket price
- Establish a modern learning environment across a group of schools
- Enable new, digital teaching methods to be trialed, assessed, and adopted

### Requirements

- Ensure seamless connectivity throughout all campuses
- Provide granular management of network usage
- Reveal insights to inform continued refinement

- Downscale global climate models to obtain more localized projections

- Perform intensive simulations to generate detailed climate data

- Enhance the efficiency and accuracy of climate modeling

### Solution

- HPE Aruba Networking 5406R Switches
- HPE Aruba Networking 2930F Switches
- HPE Aruba Networking Wi-Fi 6 Campus Access Points
- HPE Aruba Networking Central
- HPE Aruba Networking ClearPass

### Outcomes

- Supports a digital learning experience for 11,000 students at five schools
- Ensures robust security through granular network access policies
- Allows network management from a single pane of glass
